

Requirements are listed in order of priority.

### **Iteration 1**

1. The page displays a list of menu items.
  - 1.1. Menu items have ingredients, allergen information, and prices listed on the sides.
  - 1.2. All staff members are allowed to change ingredients, allergen information, and prices for each menu item.
  - 1.3. The owner and only the owner is allowed to add or remove menu items from the list.
2. The owner and only the owner is allowed to assign menu items to categories.
  - 2.1. The owner and only the owner is allowed to create or remove categories.
3. The page displays a company name and logo at the top.
  - 3.1. There is a tagline near the company name.
  - 3.2. The owner and only the owner is allowed to change the tagline.
4. The bottom of the page contains a warning about raw meat consumption.

### **Iteration 2**

1. Customers are able to make orders.
  - 1.1. There is a cart system that stores menu items for a customer.
    - 1.1.1. There is a cart button at the top of the page.
    - 1.1.2. Pressing the cart button opens a separate page that displays the cart's contents.
      - 1.1.2.1. There is an order button on the cart page.
      - 1.1.2.2. Pressing the order button sends the contents of the cart as an order.
  - 1.2. An add button is displayed next to each menu item.
    - 1.2.1. Pressing the add button adds the menu item to the cart.
2. Orders are sent to the restaurant director.
  - 2.1. The director is able to assign a waiter to each order.
3. The system keeps a record of all orders that are received.
  - 3.1. The system creates a weekly order report.
    - 3.1.1. The report contains the total number of orders that were received.
    - 3.1.2. The report shows how many orders were assigned to each waiter.

### **Iteration 3**

1. Each order displays its current status.

- 1.1. Possible status messages will include received, in-preparation, final touches, on the way, and completed.
  - 1.2. Customers are able to see the status when looking at their order.
  - 1.3. The director and only the director is able to change the status of an order.
2. Customers have the option of adding a tip when making an order.
